

**Date:** October 2006  
**To:** American Standard Customers  
**Bulletin:** 2006-237  
**Subject:** PEX Shower Valves

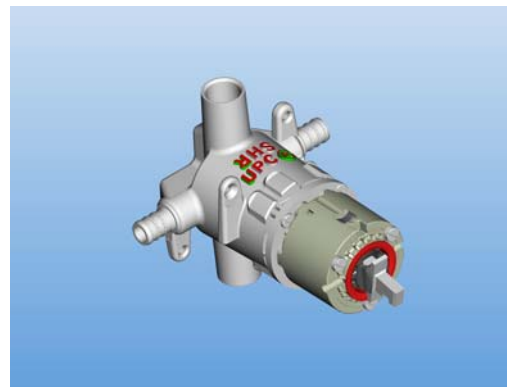

---

American Standard is pleased to announce the addition of our new pressure balance shower valves with PEX connections. These valves offer the same great performance and competitive pricing as our other pressure balance shower valves. **The PEX shower valves are available to order now.**

With the cost of copper continuing to rise, the growing popularity of PEX as a viable alternative with builders will only continue to become stronger. Some of the main benefits of this type of plumbing system are flexibility, lower material cost, and corrosion resistance. The American Standard valve fits well with these benefits giving the builder/plumber an easier and quicker alternative to installing a shower valve with PEX tubing saving time and money.

**Features:**

- ½" PEX connections (ASTM F1807)
- Compatible with most common crimp fixation system
- Offer the same great performance as R110 & R120 valves
- Easy installation
- Available with and without screwdriver stops
- Compatible with trim in the TRIMendous Bath/Shower program
- Available individually or in Bulk Pack quantities

For more information regarding the PEX shower valves, contact your American Standard Sales Representative.
